

Aayush S. Patel

BCA Student | Full-Stack (MERN) Developer

Email: aayushp8106@gmail.com | Phone: +91-8657114452 | GitHub: github.com/Aayush8106 | LinkedIn: linkedin.com/in/aayushPatel81

OBJECTIVE

Final-year BCA student with hands-on experience building real-time, networked web applications using the MERN stack and PostgreSQL. Skilled in WebSockets, session management, and WebRTC, with practical projects including a public chat room and a peer-to-peer file-sharing tool. Currently strengthening React skills while continuing to build full-stack projects. Looking for an opportunity to apply and grow these skills in a professional development role.

EDUCATION

Bachelor of Computer Applications (BCA)

Final Year (Currently Pursuing)

TECHNICAL SKILLS

MERN Stack: MongoDB, Express.js, Node.js — fully proficient; React.js — currently learning

Databases: MongoDB, PostgreSQL

Real-Time & Networking: WebSockets, WebRTC, Session Management

Libraries & Tools: Nodemailer (email sending from Node.js)

Core Concepts: REST APIs, Client-Server Architecture, Peer-to-Peer (P2P) Communication

PROJECTS

Public Chat Room

Real-time messaging app using WebSockets

- Built a real-time public chat room enabling multiple users to exchange messages instantly using WebSocket connections.
- Implemented session handling to manage and identify connected users during a chat session.
- Designed the backend with Node.js and Express to broadcast messages to all connected clients with minimal latency.

P2P File Sharing

Peer-to-peer file transfer application using WebRTC

- Developed a peer-to-peer file-sharing application allowing direct file transfer between users without routing data through a central server.
- Used WebRTC data channels to establish direct peer connections for fast, secure transfers.
- Handled signaling and connection setup to establish reliable P2P links between peers.

CURRENTLY LEARNING

- React.js — building UI components and completing the MERN stack end-to-end.
